Experience

Skylex Technologies Pvt. Ltd.

Pune, India

Software Engineer (Cloud & Data Operations)

Oct 2022 – Sept 2023

- Supported cloud-based applications on **AWS (EC2, IAM, VPC, S3)**, ensuring secure access and high availability for application and data workloads.
- Collected, monitored, and analyzed **system logs and operational metrics** using AWS CloudWatch to identify performance issues and abnormal behavior.
- Assisted in building and maintaining **data pipelines** for application monitoring data, including ingestion, validation, and structured storage.
- Performed **basic data analysis** on operational datasets to detect patterns, anomalies, and risk indicators such as spikes in usage or downtime.
- Automated operational and data-related tasks using **Python and shell scripting**, reducing manual effort and improving data reliability.
- Worked with **Docker and Kubernetes** to support scalable services generating large volumes of operational data.
- Collaborated with cross-functional teams in an **Agile environment** to ensure data quality, accurate reporting, and actionable insights.

DarkCode Pvt. Ltd.

Pune, India

Project Manager

Jun 2021 – Jan 2022

- Gathered and documented **client requirements**, coordinated with developers, and delivered over 10 business-ready web applications.
- Ensured project timelines, data accuracy in reporting, and clear communication between technical and non-technical stakeholders.

Education

Welingkar Institute of Management Development and Research

Mumbai, India

MBA (IT Project Management)

Jan 2024 – May 2026

CGPA: 9.1

Bharati Vidyapeeth (IMED)

Pune, India

Bachelor of Computer Application

Aug 2019 – Jun 2022

CGPA: 8.4

Skills

Programming & Data: Python, SQL, Statistics (Basic), Data Analysis

Tools & Technologies: AWS, Docker, Kubernetes, Jenkins, Git, Linux, MongoDB, Grafana, CloudWatch, Terraform (Basic)

Data Visualization: Grafana dashboards, operational reporting

Soft Skills: Analytical Thinking, Communication, Problem Solving, Attention to Detail, Team Collaboration

Projects

System Metrics & Usage Analysis Project

Data Collection: Collected application and system-level metrics such as CPU usage, memory utilization, request counts, and timestamps from cloud-based services.

Data Processing: Cleaned and structured raw metric data using **Python**, handling missing values and ensuring consistent time-series formatting.

Analysis: Performed basic **exploratory data analysis** to understand usage trends, peak load periods, and recurring performance issues.

Visualization: Created simple **Grafana dashboards** to visualize system performance trends and highlight unusual behavior.

Automation: Automated periodic data collection and summary reports using **Python scripts**.

Outcome: Improved visibility into system behavior and enabled quicker identification of performance anomalies.
